

Logging all Structures to a Tree

The Data Configuration feature of Orx makes it simple to build up a complex scene or object with minimal code. All these items are defined in various ini files however the developer chooses to arrange them.

Orx provides a nice way to display a tree view of your Orx objects currently in game, and what structures make them up.

Let's say you had a robot made up of several Objects, Graphics, Bodies and Textures. Also there is a Viewport and Camera:

```
[MainViewport]
Camera = MainCamera

[MainCamera]
Position = (0.0, 0.0, -1.0)

[RobotGraphic]
Texture = robot-inside.png

[Robot]
Graphic = RobotGraphic
ChildList = LeftWheel # RightWheel # WeaponObject
Body = RobotBody

[RobotBody]
PartList = RobotBodyPart

[RobotBodyPart]
Type = box

[WeaponGraphic]
Texture = weapon.png

[WeaponObject]
Graphic = WeaponGraphic
Body = WeaponBody

[WeaponBody]
PartList = WeaponBodyPart

[WeaponBodyPart]
Type = box
Solid = true
```

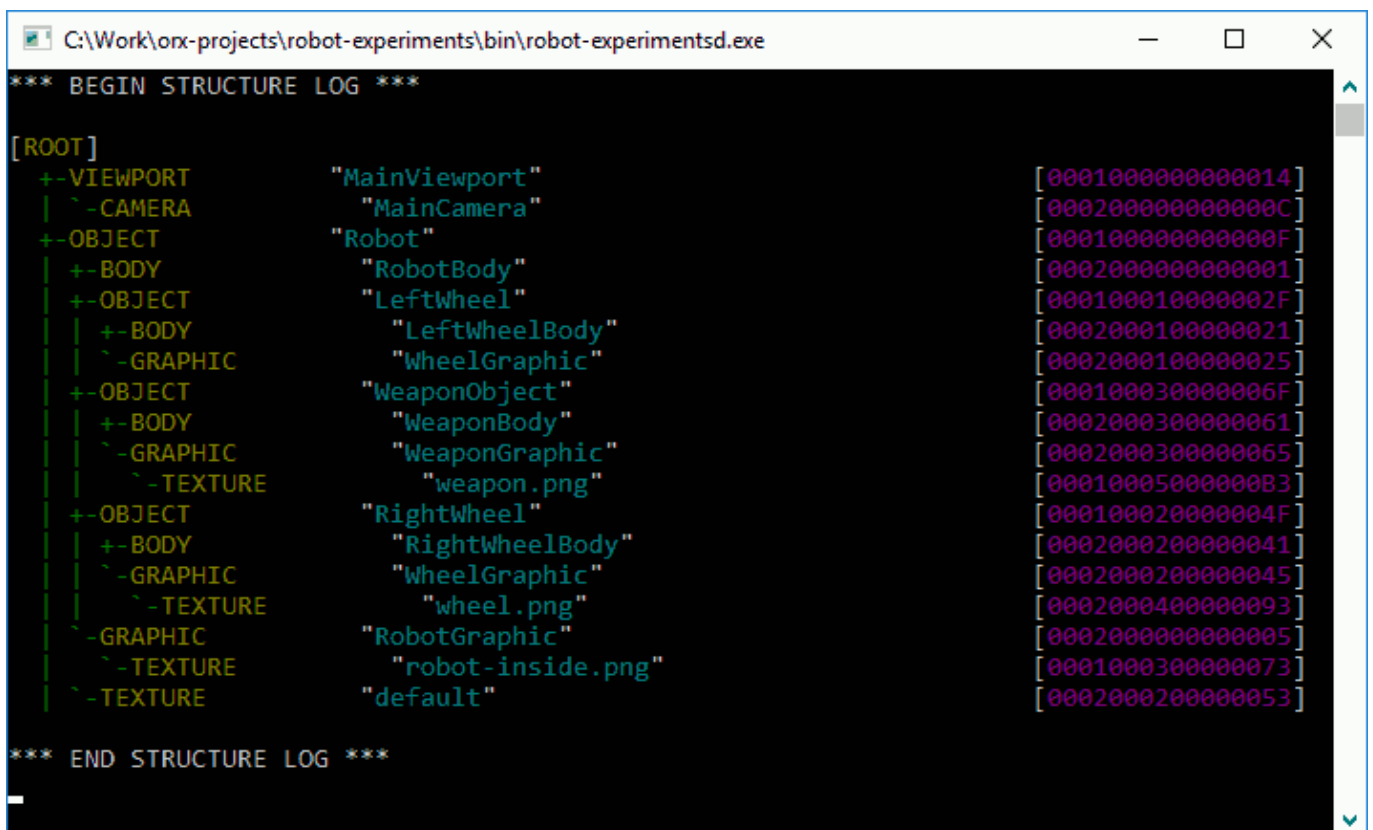

The robot would be created in-game with:

```
orxObject_CreateFromConfig("Robot");
```

Use the following command to log out all the current Structures live in your game:

```
orxStructure_LogAll();
```

In your console window, a coloured tree will be displayed:

Also, in your game log file, the same output would be generated:

```

*** BEGIN STRUCTURE LOG ***

[ROOT]
+-VIEWPORT      "MainViewport"

```

*** END STRUCTURE LOG ***

This is very handy for getting a nice overview of your structure layout for debugging or comparison.
