

# Find the Path of a File

Finding the path of a file bundled with Orx's config files and image can be non-trivial without Orx's utilities in a platform independent manner.

## Code

```
const orxSTRING zLocation = orxResource_Locate("Magic", "Awesome.mag");  
// zLocation looks like "file:/path/to/Awesome.mag" if found  
if(zLocation)  
{  
    const orxSTRING zPath = orxString_SearchChar(zLocation,  
orxRESOURCE_KC_LOCATION_SEPARATOR) + 1;  
    // zPath looks like /path/to/Awesome.mag  
}
```

## Config

[Resource]

```
Magic = @.Config ; Define a custom resource group "Magic"
```
